

Clay Pot Bat

Make this fun little Halloween decoration

What you will need

- 1 1/2 in standard clay pot
- 1 inch wooden head
- Black Fun Foam or black construction paper
- 2 small goggle eyes
- Black paint
- 1 inch Paint brush or foam brush
- Glue gun and glue stick
- Parent help with glue gun
- White glue
- Paint shirt
- News paper or plastic

Instructions

Use the glue gun to attach wooden head to the inverted small clay pot. Paint the whole body and head black and let dry. Use white glue to put on googly eyes. Use the pattern below and black paper or fun foam to make the wings and ears and cut them out. Give the ears and the wings a bend on the dotted lines. Use a glue gun to attach the wings to the center back of the bat and attach the ears on each side at the top of the head. These instructions are for very small bats, but there are larger wooden heads and clay pots. Bigger bats would be fun to make too. Make just one or make a few.
